Yankton County
Emergency Management

Yankton County
Search and Rescue

This program will be a mix of all specialties including tactical, search and disaster to meet your specific needs.

"Awesome class with very knowledgeable instructors. Highly recommend this class to everyone, whether you are Fire, EMS or Law Enforcement. See you all next year!"

"One of the best classes I've taken in 16 years."

"Very practical and hands-on."

"There is so much experience in so many different fields that I did not hear a question go unanswered."

Multidisciplinary Expertise

K9 MEDIC™ rallies together the worlds of Special Operations Tactical Medicine, Veterinary Medicine, Wilderness Medicine and Human EMS. Experts in these areas continuously deliver leading-edge knowledge, techniques and been-there-done-that reality to our constantly evolving program, setting the standards and defining the industry.

Requirements

- Notebook and pen (presentation slide handouts provided)
- Watch for assessing vitals
- No further gear is necessary; K9 MEDIC supplies all student supplies and equipment. However, if you like you are welcome to bring whatever you already use when your team deploys in the field. Together, we can review your kit and make suggestions to best support your requirements.

If I am a K9 Handler, Should I Bring My K9?

Probably. Your own K9 is the most likely patient you'll ever need to treat under adverse conditions, so it's best to learn how to do it right in a safe, controlled environment. We typically welcome handlers to practice skills—including assessments, carries, and sub-Q fluid administration—on their own dogs as long as the dog does not create a distraction for the handler or other students. Please bring a muzzle for your dog and let us know before the course if you are planning on bringing your K9.

Please also note that some exercises cannot be done with your K9 and you will need either a way to crate or otherwise secure your K9 during these exercises. Vehicles are close by on site and we mandate frequent checks on all K9s to ensure their safety.

Dress Code

This is a hands-on, physically active, indoor and outdoor professional class. Please dress accordingly. We encourage you to wear the agency uniform that you wear in the field. No open toe shoes, shorts, tank tops, etc. Students with inappropriate attire will not be admitted.

Course Completion

Students are expected to be in attendance at all times and complete all skills stations in order to receive a Certificate of Course Completion.
