### Pediatric ♦ Rehab ♦ Sports

#### **Presentation #1**

Bracing for the Pediatric Patient - A Rehab Perspective

By: Sarah Rowley, MPT &  
Barb Knutson, OTR/L

Objectives for Presentation #1:

Upon completion of the presentation, participants should be able to:

1. List common pediatric diagnoses in which bracing could be beneficial
2. Describe frequent used types of braces for the pediatric patient
3. Discuss rehab consideration for pediatric bracing recommendations
4. Explain role of Physical and Occupational Therapy in a multidisciplinary specialty clinic

#### **Presentation #2**

Emerging Role of Care Management in Pediatric Subspecialty Care

By: Mari Findley, RN

Objectives for Presentation #2:

Upon completion of this presentation, participants should be able to:

1. Explain the role of Care Management at Shriners Hospitals for Children
2. Define specialized care needs of kids with orthopedic issues
3. List the necessary requirements to accurately prepare a child and family for surgical procedures and follow-up at home post discharge for outstanding outcomes

#### **Presentation #3**

Effective Treatments of Common Injuries Occurring in Young Athletes

A Pediatric Orthopedic Perspective

By: Michael Priola, DO

Objectives for Presentation #3:

Upon completion of this presentation, participants should be able to:

1. Identify the 4 joints that are most commonly injured in young athletes
2. Explain the treatment of pediatric injuries in the shoulder, elbow, knee and ankle
3. Recognize when an injury would require treatment from a pediatric orthopedic surgeon
